

JOHN DOE

(555) 123-4567 | john.doe@email.com | linkedin.com/in/johndoe | github.com/johndoe

SUMMARY

Experienced data professional with a strong background in business analytics, engineering, and machine learning. Proven track record of delivering high-impact projects and optimizing complex workflows.

EDUCATION

| | |
|---|---------------------|
| UC San Diego <i>Master of Science in Business Analytics</i> | La Jolla, CA |
| GPA: 3.9/4.0 Relevant Coursework: Advanced Analytics, Machine Learning, SQL, Big Data Systems | Sep 2024 – May 2026 |
| State Technological University <i>Bachelor of Technology in Computer Science/Biotechnology</i> | Country |
| GPA: 3.8/4.0 — Graduated with Honors Coursework: Data Structures, Algorithms, Statistics, Programming (Python, C++) | Aug 2018 – May 2022 |

EXPERIENCE

| | |
|--|---------------------|
| Senior Data Analytics Engineer <i>Tech Solutions Inc.</i> | Jun 2022 – Present |
| • Designed and implemented scalable data dashboards using Python and SQL, leading to a 15% increase in operational efficiency. | Remote |
| • Automated complex ETL pipelines for real-time reporting, standardizing data architecture across multiple departments. | |
| • Managed a cross-functional team of 5 to deliver high-priority analytics projects for executive stakeholders. | |
| Software Engineering Intern <i>Global Software Corp.</i> | Jan 2022 – May 2022 |
| • Optimized backend database queries, reducing response times by 10% for high-traffic applications. | San Francisco, CA |
| • Collaborated with senior engineers to implement new features in Java and Python, ensuring high code quality and test coverage. | |

PROJECTS

| | |
|--|---------------------|
| Snowflake Analytics Project <i>Snowflake, SQL, Python (ETL), dbt, Plotly, Tableau</i> | Feb 2023 – Apr 2023 |
| • Developed star/snowflake schemas and Python ETL pipelines into Snowflake, building dbt models and optimized Plotly/Tableau dashboards that improved query speed by ~25%. | |
| • Implemented query optimization and RBAC; interactive Plotly/Tableau dashboards surfaced sales, churn, and profitability trends, reducing dashboard latency by ~25%. | |
| HyperSense — ML Project <i>Python, Pandas, TensorFlow, Plotly</i> | Jul 2022 – Jan 2023 |
| • Designed a BiLSTM pipeline for hypersense detection achieving 0.98 AUC-ROC on benchmarks, with visualizations using Plotly. | |

HONORS & AWARDS

| | |
|--|-------------|
| Mentorship Lead University Tech Club | 2021 – 2023 |
| First Place, Innovation Challenge National Engineering Summit | 2022 |

TECHNICAL SKILLS

Languages & Tools : Python, SQL, Java, SAS, Tableau, Plotly, dbt, Snowflake, AWS, Git
